

# A reconstruction of Fincke's trigonometric tables (1583)

Denis Roegel

2 September 2021

(last version: 2 September 2021)

# Introduction

This document gives exact (modern) reconstructions of Thomas Fincke's trigonometric tables published in 1583 [1] (figures 1, 2, and 3).

Fincke's original tables, with which these reconstructions can be compared, were basically taken from Reinhold (1554) for the sines and the tangents, but the secants were certainly computed from the tangents.

The context of these tables, as well as the details of their construction are found in my separate survey [2].
